NIH Study Section Member, February, 2000 – October, 2001 (BBBP-5)

Current Activities

My current activity falls into four categories: (1) writing textbooks, (2) fulltime faculty at Youngstown State University and parttime faculty at the University of Phoenix, (3) professional commitments, and (4) writing trade books. Until the summer of 2003, I also maintained a small private practice.

Textbook Writing. I just published the eighth edition of my research methods text with Tony Graziano. It was released in the summer of 2012 (2013 copyright date). It includes an extensive *Student Resources Website*, an *Instructor's Manual*, and a computerized test bank.

Clinical Work. Until August of 2003, I maintain a part-time private practice through Linwood Psychotherapy Services while working on the abnormal psychology text. I specialized in treating anxiety disorders, which is an outgrowth of my work with the Anxiety Disorders Clinic at SUNY. Since my move to Ohio, I have stopped seeing clients and instead will be working on textbook writing, teaching, and research.

Professional Commitments. I just completed twelve years on the editorial board of the *Journal of Abnormal Psychology*, and I occasionally review articles for other journals. I have done several ad hoc reviews for various NIH programs over the last several years and previously served on the NIH BBBP-5 study section.

Writing Trade Books. In addition to my textbook writing, I am also working on a trade book focused on an analysis of the public education system in the United States, with a focus on how it would change if it operated on a free market economy

Adjunct Association. I continue to maintain an adjunct appointment in the department of psychology at the State University of New York at Buffalo.
